Profile

Data Analyst and Computer Science graduate with 1+ years of experience in data analysis and data warehousing. Currently working at DMS Egypt, delivering reporting solutions for the Ministry of Health and building a data warehouse to centralize data, accelerate reporting processes, and improve data efficiency. Skilled in SQL, Oracle Database, Excel, Power BI, SSIS, Metabase, ETL, and dashboard development.

Work Experience

Data Analyst | DMS Egypt Nov 2025 - Present

- Design and develop analytical reports for the Ministry of Health using Metabase to support decision making.
- Build and maintain a data warehouse integrating data from the Ministry of Health database using SSIS and SQL.
- Develop and manage ETL processes to ensure accurate, consistent, and timely data availability.
- Contributed to the development of an AI Chatbot for Magrabi Hospitals Through prompt engineering.
- Tools: SSMS, SSIS, Toad and Metabase.

Education

Bachelor's degree in Computer Science | Cairo University Oct 2020 - Jan 2025

- Department: Decision Support and Operations Research
- Graduation Project: Non-Alcoholic Fatty Liver Disease Prediction | Grade: Excellent | (GitHub).

Training

Power BI Development | 4-Month Program Intensive Code Camp (ICC) | Information Technology Institute (ITI) July 2025 - Nov 2025

- Completed an intensive internship focused on Business Intelligence, databases, Power BI, Excel, and data modeling, gaining practical experience with real-world business scenarios.
- Designed and implemented data pipelines (ETL/ELT) using SQL, SSIS, and NoSQL databases to ensure efficient data integration and transformation.
- Applied data warehousing concepts including dimensional modeling and schema design, developed interactive reports and dashboards with SSIS, SSAS, SSRS and explored Azure cloud services for scalable BI solutions.

Projects

- **Olist E-Commerce Marketing Analytics** | (GitHub) | Power BI, Power Query, DAX Oct 2026
  - Designed a dimensional data model using a Galaxy Schema to integrate e-commerce and marketing data.
  - Used Power Query for data cleaning and transformation, and DAX to calculate business KPIs.
  - Developed Power BI reports to analyze sales, customer behavior, order fulfillment, payments, and marketing performance.

- **ITI Examination System** | (GitHub) | SQL, SSRS, Python, Power BI Nov 2025
  - Comprehensive end-to-end academic management project for the Information Technology Institute (ITI), enabling efficient student evaluation, performance tracking, and BI insights.
  - Designed a fully database with stored procedures and complete ERD mapping for students, exams, instructors, and evaluations.
  - Built a snowflake schema with fact & dimension tables; created interactive Power BI dashboards and SSRS reports for performance tracking and forecasting.
  - Developed a functional front-end with Lovable AI, integrating backend workflows and BI insights seamlessly.
- **Hotel Reservation Performance Dashboard** | (GitHub) | Power BI (Power Query, DAX) Oct 2025
  - Analyzed a dataset of 119,390 hotel bookings to uncover insights on booking patterns, cancellations, and guest behavior. Cleaned data by correcting errors, and handling missing values. converted the main table into a star schema, and developed interactive dashboards to visualize performance and key trends.
- **Car Sales Project** | (GitHub) | Excel (Power Query, Power Pivot, DAX), Python July 2025
  - Analyzed a dataset of 157 car models across 30 manufacturers to derive business insights, Cleaned data using Python, handling missing values with scikit-learn machine learning models, visualized data in Excel using Power Query, Power Pivot, and DAX to create interactive dashboards showcasing key metrics.

Courses

- **Data Analyst in Power BI** | Data Camp | 50 hrs. | Certificate Sep 2025
  - Learned how to clean, model, and visualize data to create interactive dashboards and reports, gaining hands-on experience with DAX and Power Query (M language) for calculations and data transformation, extract actionable insights and support business decisions through data-driven analysis.
- **IBM Data Analyst Professional Certificate** | Coursera | 151 hrs. | Certificate Jun 2023 - Aug 2023
  - Gained practical experience with Excel, SQL, Python, and Jupyter Notebooks, conducted exploratory data analysis (EDA) to identify patterns and insights, and designed interactive dashboards for reporting and decision-making.
- **Data Analysis Foundations** | Egypt FWD | 8 Weeks | Certificate Jul 2022 - Aug 2022
  - Learned core concepts of data analysis, statistics, and visualization techniques.
  - Gained hands-on experience using Excel and Python to analyze real-world datasets.

Skills

- Technical: Excel, Power BI, SQL, SSIS, Metabase, Python, Prompt Engineering, C++, OOP.
- Interpersonal: Collaboration, Team Work, Leadership.

Languages

- Arabic: Native.
- English: Intermediate.

Additional Information

- Military Service: Exempted.
